## A Man of the People In Race for Congress

John A. Horton of Belton Spoken of in Most Desirable Manner by Those Among Whom He Has Lived.  
A Boy Who Has Forged His Way Forward and Made Himself Recognized

The following brief sketch was written by the editor of The Belton Journal, in Mr. Horton's home town:

John A. Horton, our candidate for congress, was born in August, 1874, on his father's farm near Belton. As a small boy he attended school here in Belton, having to walk the distance of four miles each day. He was determined to have an education, and never stood back on account of wind or weather, but was always present and always led his class. From here he went to the Patrick Military Institute, in Anderson, teaching school there the summer months to pay his tuition. He was graduated from this institution in 1895. He then went into the grocery business on a small scale, but soon his business had grown to be one of the largest in Belton.

In 1903 he organized the Farmer's Bank of Belton with a capital stock of \$25,000. He met with a great deal of opposition in this venture, especially by Hon. A. C. Latimer, but when this gentleman saw how determined Mr. Horton was to succeed he withdrew his objections, and was one of the biggest stockholders—showing how much confidence he had in Mr. Horton. The bank has grown to a surplus of \$17,000 under his able management. He did all the work himself for several years, but now he and his cashier are both taxed to keep up with it.

He was mayor of Belton for three terms, retiring each time on account of business. It was during his administration that lawlessness was practically wiped out of Belton. His fearless administration did honor to him, accomplished the end he was striving for—a law-abiding as well as a clean town. He was always merciful where circumstances warranted it, and did his duty as an honest man should.

Mr. Horton was married in June, 1910, to Miss Emmae Tate, one of Elberton, Georgia's, most attractive young ladies. Socially they are one of the most popular couples in Belton, and as a business man Mr. Horton is

honored as highly as any man in Anderson county, because he has succeeded at everything he has ever undertaken, because his character is clean and honorable, because he sticks to his business, because he can always be depended on to be at his post and because he will do what is right while he is there.

That is the kind of man Belton is offering to this district as a candidate for their representative, and surely that is the kind of a man every good, honest voter in this district wants to represent him in our congress.

If you vote for Mr. Horton you can feel safe that when a roll is called in congress he will be present to answer to his name and to have your interests truly at heart. Born of farmer parents, brought up a farmer boy and thrown in close contact with farmers' needs—not the theories, but the actual need.

Living for years in a mill town, he also knows their needs, and being a banker he knows their needs and is ready to work for them all to the best of his ability, as he has always done in everything he undertook to do.

Belton is proud of John A. Horton and predicts great things for his future.

### Horton Looming Up.

From Anderson Farmers' Tribune.

From different sections of the Third Congressional district, the Tribune is receiving messages that Hon. Jno. A. Horton is daily gaining ground. The Tribune has set out to elect Mr. Horton and wants the help of all those who believe it is time the district was electing a real representative. Mr. Horton is a man of the ranks, starting out in life without financial help. He has shown his business ability by accumulating considerable property, which was earned by the sweat of his brow and not by grafting or the help of monied men. Mr. Horton is a man possessing an unusual amount of en-

ergy and is a sticker. He never gets discouraged or gives up, and for that reason he has made good in the business world. Remembering the hard road he had to travel, Mr. Horton is said to have reached down and helped several struggling young men, who appreciated his aid and have followed in

gressman. Every day, people, voters, the Democrats of this district, come in and jump on the editor with both feet and tell us that we are not saying anything at all about our next congressman, John A. Horton. We try to reason with them and claim that we have

JOHN A. HORTON, CANDIDATE FOR CONGRESS, THIRD DISTRICT.

his footsteps and made good. We hope that the friends of Mr. Horton will take advantage of every opportunity and "talk Horton."

Strong Demands That He Make Race. From The Belton Journal.

No doubt some people may think that the editor of this paper is having too much to say about the candidacy of Mr. John A. Horton for congress—this being an off year. But readers, bless your souls, we can't help saying a few nice things about our next con-

gressman. Every day, people, voters, the Democrats of this district, come in and jump on the editor with both feet and tell us that we are not saying anything at all about our next congressman, John A. Horton. We try to reason with them and claim that we have

enter the race next summer and he will tell you something.

### John Horton For Congress and Why The Tribune Will Support Him.

From Anderson Farmers' Tribune.

Mr. John A. Horton, a well known business man and farmer of Belton, has disrobed, took a header over the bank and dived into the congressional race in the election to be held next summer. The editor of The Tribune supported Mr. Horton in his last race and proposes to continue to stick to him. Mr. Horton was the only Anderson man in the race last year and believing it my duty to support a home man, he got my suffrage, and I see no reason why I should now swap horses. Mr. Horton losing out in the first race, I supported Mr. Dominick in the second. I not only supported Mr. Horton in the first race on account of long-standing friendship, but because he is competent and because of county pride. For that reason, I will jump in with him again and, sink or swim, I expect to do all I can to elect him. I make this announcement in order that there may be no misunderstanding as to how I stand on the congressional race. In this race, as in every other race or question, I will not be found on the fence.

Mr. Horton and myself have not only been life-long friends, but we are old school mates, having attended the old Patrick Military Institute together.

In an article I wrote to one of the local papers last winter, in commenting on the fact that the Third Congressional District had no representative and that Anderson county had been completely ignored by Governor Manning in his appointments, as well as by Congressman (?) Aiken and the United States senators, I stated that little counties like Abbeville not only got all the honors, but the offices as well, and called on the people of Anderson county to support an Anderson man next summer for congress. The people of this county are continually grumbling because it is ignored, when it should be if it hasn't enough county pride to stick to home men when they announce for state and national offices. Now that Mr. Horton will make the race for Anderson county, it is the duty of Anderson county voters to stick to him.

I frankly concede to every voter the right to make his own choice in the matter of a candidate for congress, and I presume he will do so. I know I will. Then when the result is an-

nounced, I will never kick, no matter who wins, but will fall right in line and stay with the gang. That's all the sort of democracy I know. Before the nomination is made, I always want everybody to know who I am for, because after the nomination it will be no secret, as I always vote for the ticket. For this reason, I will say that in my opinion, the Anderson county man who is most pre-eminently entitled to the nomination is John A. Horton of Belton.

V. B. Cheshire.

### GERMAN POTASH SUBSTITUTE

A Canadian Patent Process For Reduction of Feldspar.

One of the most promising of the many efforts made to find a substitute for German fertilizers is a patent taken out a few weeks ago by a Canadian for a method of using the potash in ordinary feldspar.

This process consists of heating the feldspar with limestone and iron oxide at a temperature of about 2,200 degrees Fahrenheit, which produces a partly-fused mass that is easily decomposed by a weak acid. From this product the potash salts can readily be extracted for further purification.

A practical try-out for another method of obtaining potash fertilizer will soon take place at a New Orleans distillery where molasses is used in large quantities. It is said to be a fact that 106 tons of potash are wasted daily by the 25 or more distilleries in this country that subject molasses to processes of fermentation.

The New Orleans company is planning to install the process of saving the potash in distillery waste recently brought to the attention of the public by the bureau of foreign and domestic commerce.

It should be possible to make fertilizer from this otherwise worthless material at a price that will meet competition even after the war is over.

Smart Young Man—What do you think of Brown?

Indignant Old Gentleman—Brown, sir! He is one of those people that smack you on the back before your face and hit you in the eye behind your back.—Tit-Bits.

Cures Old Sores, Other Remedies Won't Cure. The worst cases, no matter how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves pain and heals at the same time. 50c, \$1.00.
